

My Thoughts On Rust Education (*put your title here*)

Rust Education Workshop 2020

Bart Massey <bart@cs.pdx.edu> (*put your info here*)

(sample text) I think Rust is pretty neat. It would be great if more University Computer Science classes used the language: not just teaching Rust, but using it in classes throughout the CS curriculum.

It is hard to get Rust into CS courses for a bunch of reasons. I do not know how to solve this problem myself, although I have some ideas. A first step might be to gather a bunch of folks interested in Rust education for a Workshop where they can exchange ideas and plan together. We could also figure out how we could help to improve Rust learning in general: for example, improving the Rust language and tools to make learning easier.

I hope this idea will take off. I think Rust-based education can move faster if we all work together.
